Release Planner for Power Pages

https://experience.dynamics.com/releaseplans/?app=Power+Pages

Summary from the Release Notes

Power Pages

Power Pages continues to invest in bringing more out-of-the-box capabilities to support both low and no code development as well as professional developers. New features in this release will allow makers to have additional capabilities and solution templates in the Design Studio. Professional developers will be able to perform additional actions and work with code productively using Power Platform CLI tools and Visual Studio Code, and administrators will be enabled to better manage and govern their Power Pages sites.

Microsoft

Power Platform

2023 Release

Wave 1 Release

Power Pages

https://youtu.be/NxBI3nx3dfE?t=300

2023 Release wave 1 for Power Pages

Administration and governance

Administration and governance capabilities enable administrators to efficiently manage, configure, and maintain websites.

Feature	Enabled for	Public preview	General availability
Implement data loss prevention policies	Users by admins, makers, or analysts	Apr 2023	Jun 2023
Provide website inventory data for tenants and environments	Admins, makers, marketers, or analysts, automatically	-	Jun 2023

Core platform

The core platform provides makers with capabilities to configure, customize, and use as-is in low-code or no-code ways to meet business needs.

Feature	Enabled for	Public preview	General availability
Use cloud flows with Power Pages sites	Users by admins, makers, or analysts	Apr 2023	
Use Bootstrap version 5 in Power Pages	Users by admins, makers, or analysts	Jun 2023	

Professional developer experiences

Developers can build advanced customizations and configurations with their websites.

Feature	Enabled for	Public preview	General availability
Edit webpages with new features in Visual Studio Code for the Web	Users, automatically	Apr 2023	
Perform website actions using Microsoft Power Platform CLI	Users, automatically	Sep 2023	-
Manage Power Pages ALM using solutions	Users by admins, makers, or analysts	Apr 2023	To be announced

Week 2: INTEGRATIONS
Week 2
Week 3: USER INTERFACE
Week 4: DEV EXPERIENCE
Week 5: WRAP-UP

Kicking Off Low Code Feb

Welcome to our LowCode February kickoff!! The official kickoff is Feb 1 but we wanted to share a few posts ahead of time to set the context and describe the various resources available to you!

KICK OFF

- Jan 25 - It's a Low Code February!

Week 1: FUNDAMENTALS

Welcome to the Week 1 of your learning journey into Low Code Development.

WEEK 1 - TOPIC

Posts will be linked here once published.

- Feb 01 - Hello, #30DaysOfLowCode
- Feb 02 - You say Low, I say Code!
- Feb 03 - Developer Tools & Onboarding
- Feb 04 - 🚀 Zero-To-Hero Post: Developer Stories
- Feb 05 - Week 1: Recap

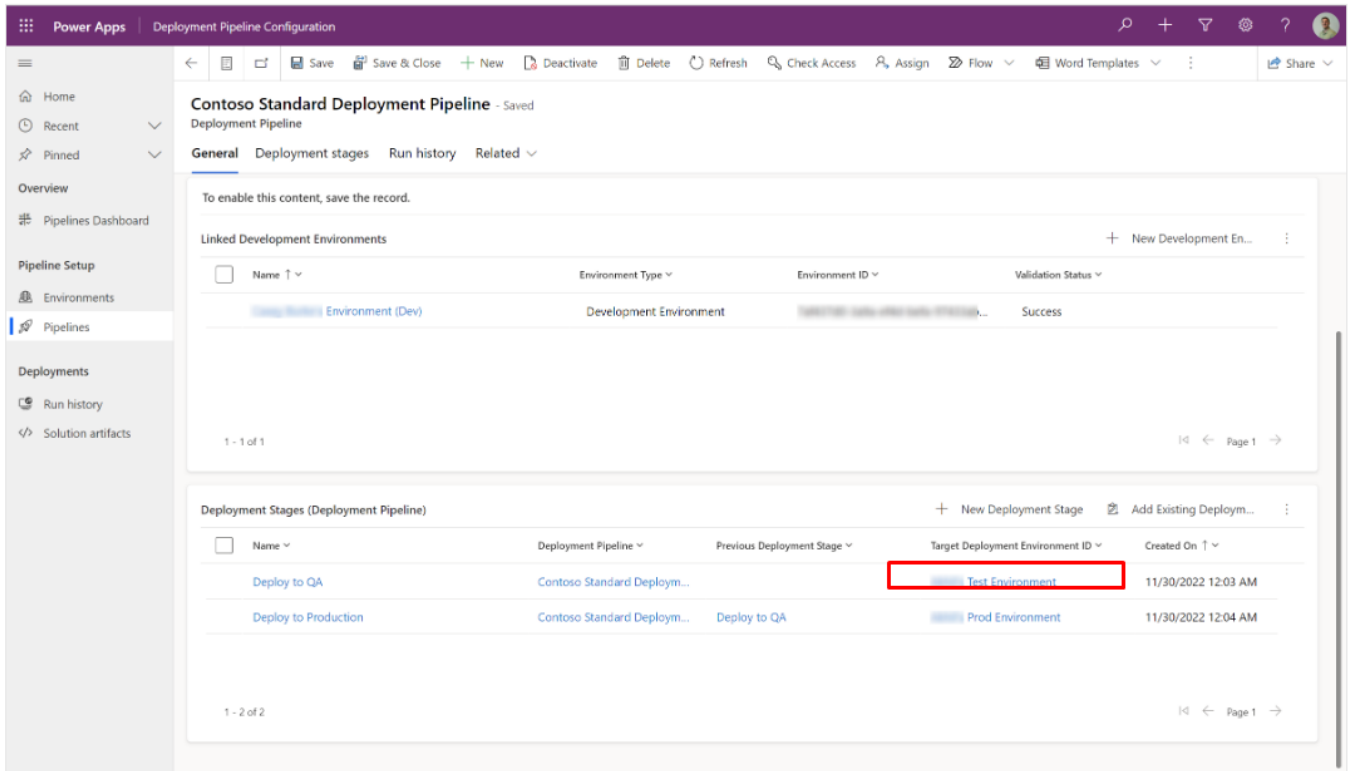
11. Enter the details for each stage, and then select **Save and Close**:

    - **Name**: The name of the stage.
    - **Description** (optional): Optional description for the stage.
    - **Previous Deployment Stage** (optional): Specifies a deployment stage that must be deployed to before deploying to the current stage. For example, when creating a production stage, you can add the test stage as the **Previous Deployment Stage**. Note that for the first stage, or pipelines containing only one stage, this should be left blank.
    - **Target Deployment Environment**: This is the target environment where this stage will deploy to.

12. Repeat the previous two steps for each stage you'd like to add to the pipeline. Note that you must have at least one stage. You can add up to seven stages.



Pipelines is only supported in Managed Environments. Learn more

As your app advances, you'll start sharing it to be used in your organization. As it gets widely adopted, it's important to practice healthy application lifecycle management by building securely in an isolated location so the people using your app don't run into issues while you work on it. Once everything is ready, you'll move it to a more permanent place and share there. Learn more
