Default design template

Customize this generic template to solve a unique business need.

Power Portals Default Cross-Industry

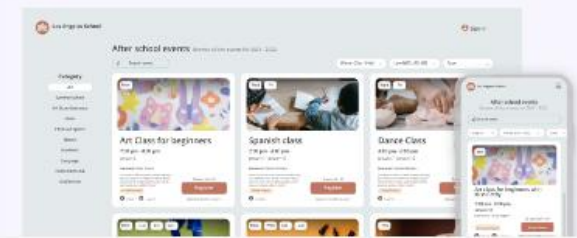

Schedule meetings with a financial institution

Enables simple location selection and appointment scheduling for all types of meetings. Includes customizable calendars, automated reminders, and more.

Financial

After school program registration

Enables parents to browse after school activities, visualize available sessions, see the program capacity, and register online.

Education

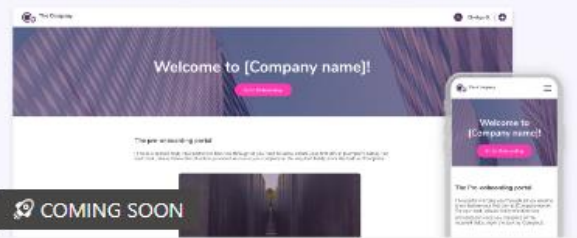

Building permit application portal

Enables online submission of permits and the ability to track their approval status.

Government

New employee onboarding checklist

Enables easier onboarding by delivering a customizable list of common activities and the ability to track the new person's progress.

Cross-Industry

Portal Templates - What's what?

There are six different Portal templates you can choose from when creating a new portal - and you cannot change the template after the fact. But do you choose the right one? I will go through all the different templates, explain when to use them and how they work. I'll also let you in on a little secret! Make your choice and make it wisely - let me show you how.

MAP TO CONFIGURING POWER APP PORTALS

With the release of the new Power App Portal in this October '19 Release we were introduced to a brand new Power Apps Portals Designer Interface. Microsoft marketed it as a new product under the slogan "Enable external access with portals" and it created some confusion. If you are still a little confused about the [difference between Power Apps for external users and Power Apps Portals](#) the link is to a blog post that will sort things out for you.

[READ THE FULL ARTICLE](#)

A collage of images related to Power Pages. It includes several screenshots of different Power Pages templates, such as 'Default single website', 'Schedule meetings with a financial institution', 'After school program registration', 'Building power pages for a school', and 'New employee onboarding checklist'. There is also a screenshot of a code editor showing HTML or CSS code. At the bottom right, there is a photograph of a tree trunk with a small framed map attached to it.
