13h ...

Adding users via automation to ADB2C tenant is not letting the user login.
UPN created is [Objectld@adb2ctenant.onmicrosoft.com](#) and Issuer is also different which is causing issues.
On top of it ADB2C does not support invitation and redeem code.
Hence after a couple of days had to switch back to Local authentication.

Power Pages In a Day

Microsoft Power Platform In a Day workshops

Experience how Microsoft Power Platform can meet your business challenges quickly and effectively by attending a virtual, one-day training workshop.

Available workshops

App in a Day

Dashboard in a Day

Paginated Reports in a Day

Robotic Process Automation in a Day

Power Virtual Agents in a Day

App in a Day

As a business leader, you need to react quickly to the changing market and cannot stay dependent on developing a software solution to do that. You want the ability to build a solution to meet your business needs swiftly. With Microsoft Power Platform, you can build great business apps without writing code.

In this workshop, you'll better understand how to:

- Digitize business processes, work more efficiently and become more paperless. With [Power Apps](#), you'll easily build and deploy custom business apps in both canvas and model-driven style of apps.
- Easily connect all your applications and share data. With [Microsoft Dataverse](#), you'll enable your line-of-business specialists to easily bring your data together and quickly create powerful apps using a compliant and scalable data service and app platform integrated

Microsoft Power Platform 2023 Release Wave 2 Plan

Highlights

Power Pages Power Pages Release Notes Overview

2023 release wave 2 will have investments across 4 major themes:

1. **Generative AI** - Using Copilot in Power Pages, you can jumpstart the site building experience.
2. **Data** - Power Pages continues to invest to connect seamlessly to data anywhere.
3. **Collaboration** - Whether you're a low-code maker or pro developer, you can create pixel perfect experiences in Power Pages and collaborate for time to value.
4. **Security and governance** - Secure by default, Power Pages makes the administration of data and websites simple.

Enable Managed Environments in Power Pages

Public Preview:
Nov 2023

Business value

Managed Environments provides a packaged offering of advanced governance and security offerings to effectively run sensitive workloads. Additionally, onboarding Power Pages will provide a governance experience consistent with other Power Platform products like Power Apps and Power Automate.

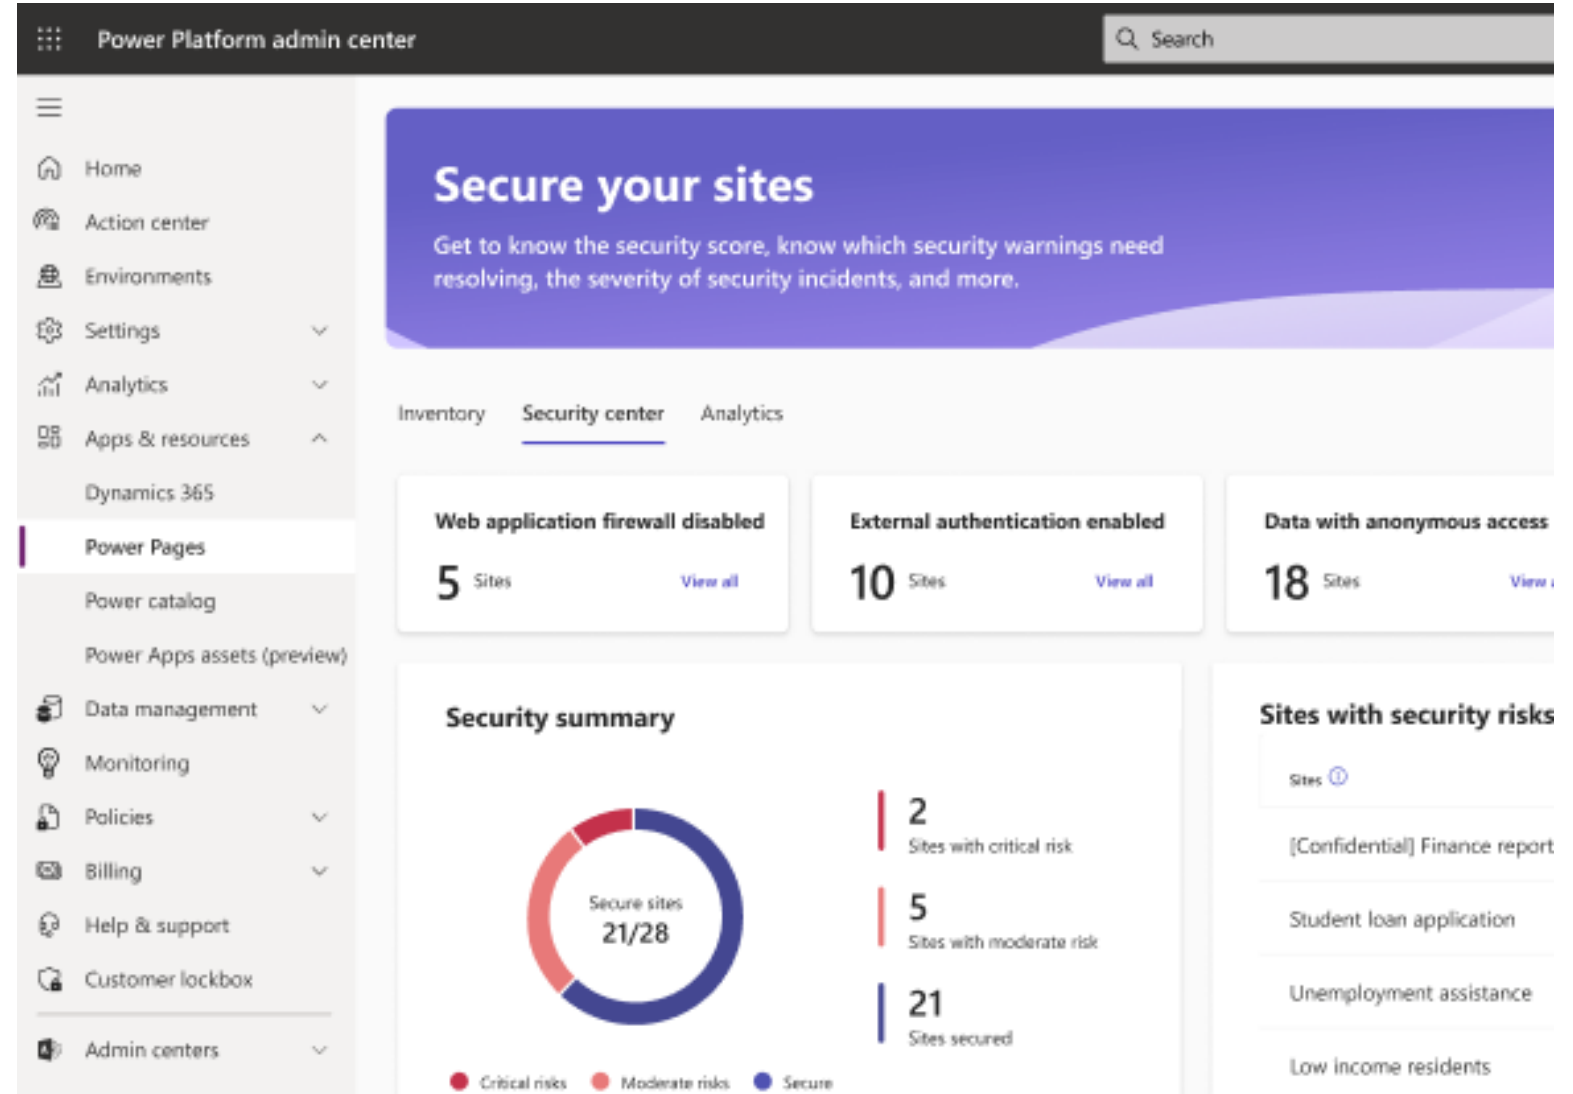

Feature details

Depending on their selections while enabling Managed Environments, Power Platform admins will be able to do the following after switching on Managed Environments for any environment:

- Add cards to their Power Platform admin center homepage surface to track maker usage and other insights and will get email digests including licensing usage.
- Get Managed Environment only specific features in Power Platform admin center, such as Power Advisor insights and actions for Power Pages.

Use admin security and analytics views

General availability:
Oct 2023

Collaborate with commenting capabilities

Public Preview:
Nov 2023

Business value

With this feature, you can enhance collaboration and productivity for fusion teams to build Power Pages websites together.

Feature details

In a typical work environment, team members look for an easy and effective way to collaborate, comment, and share notes and tasks while building websites. Power Pages makers have relied on external tools, such as emails and chats until now where conversations require additional context setting and could lower individual productivity.

Consistent with the Microsoft Power Platform, the introduction of commenting to Power Pages provides a new means of collaboration for team members who work together building websites. This is expected to boost engagement and enhance productivity among fusion teams who need to know in real-time people that they are collaborating with and also share feedback, and request reviews during their website development.

Use Copilot to create a website

Public Preview:
Oct 2023

Business value

This feature empowers makers to use Power Pages Copilot to seamlessly create a website using generative AI. Just think it, describe it. Power Pages will build it.

Feature details

As a maker, you can use Copilot in Power Pages to describe the website you're trying to build from the homepage. Once you've entered your description, Power Pages will use generative AI to determine the sitemap and generate homepage layout variations and site theme.

Once these are assembled together, you can continue to use Copilot inside the design studio to modify and refine the website.

Use Copilot to get answers to questions

Public Preview:
Oct 2023

Business value

Power Pages Copilot empowers makers with a seamless way to get answers and tips on how to build a site using the Copilot Q&A capability. Answers will summarize the information that is spread across Learn, community, and other key resources that makers rely on to learn how to build Power Pages sites.

Feature details

As a maker, you can use ask questions directly in the Copilot side car experience to get clear summarized answers on how to address challenges. Using the power of large language models combined with our extensive documentation and Learn content, Power Pages will find the right information and summarize it into easy to follow instructions or responses.

Enable website copilot actions for users

Public Preview:
Nov 2023

Business value

Makers can enable actions on Copilot added to their sites. This allows the site users to take assistance from Copilot for completing their tasks. It will also improve the C2 user experience as they will be able to complete their tasks faster by directing Copilot on the website without the need to manually locate and click through the steps.

Feature details

You'll be able to enable actions for Copilot (currently a Power Virtual Agents chatbot) on your website to help complete website actions for your users. The site users can directly interact with the site Copilot and ask for help to complete actions like filling simple forms with basic validation in place, finding and getting redirected to resources on the website, and more.

Customer Service

Use Bootstrap version 5 in Power Pages

PP Aug 23 – GA Nov 23

Business value

Create your Power Pages website using the latest Cascading Style Sheet (CSS) styling framework version 5 of Bootstrap. This upgrade also enables you to migrate your existing websites to the latest Bootstrap version using a migration tool. The tool automatically converts your code to Bootstrap version 5 and provides the ability to report the changes and modify the code per the recommendations.

Feature details

Bootstrap is a commonly used CSS framework, providing a powerful and extensible front-end toolkit for developers. Power Pages currently supports Bootstrap version 3. With this release, we'll provide the support for Bootstrap version 5 to apply to your customizations as well as for the site templates shipped with Power Pages.

Power Pages will continue to support both version 3 and version 5 Bootstrap libraries for a limited time.

Bootstrap version 5 support with Power Pages will provide the following advantages:

- Save time converting your existing websites to Bootstrap version 5 using a migration tool that will convert CSS code and provide recommendations for the breaking changes.
- Use the latest CSS controls offered by Bootstrap.
- Receive new security updates and fixes from Bootstrap.

DynUG Høstkonferanse

21. november @ 09:00 - 22. november @ 15:00

Brukernes egne erfaringer, nyheter fra Microsoft, faglige dyptdykk, workshops og nettverksbygging står som vanlig på agendaen når DynUG inviterer til sin årlige høstkonferanse – denne gangen på [Scandic Oslo Airport Gardermoen](#). Her får vi større kapasitet både til deltakere og utstillere.

[Agenda](#) | [Skjema for påmelding](#)

Overnatting og transport

Vi skal være på [Scandic Oslo Airport Gardermoen](#), som ligger noen minutter unna terminalen ved enden av rullebanen der E16 går mot Hønefoss. Hotellet har treningsrom og serverer en solid frokost med et utvalg av ekoloiske produkter, samt glutenfrie, laktosefrie og veganske produkter. Hotellet har også kafé og bar. Du kan booke hotell på [denne lenken](#) eller ringe hotellet på telefon +47 23 15 59 00 og oppgi bookingkode **BCOM211123**. Merk! for å få rabattert overnatting **må du bestille innen 20. september 2023**.

VY shuttle \$55 går fra plattform 39 på nedre plan av Oslo Lufthavn. Den kjører hvert 15. minutt mandag – fredag fra kl. 04.35 – 10.20 og 14.20 – 17.20. Lørdag og søndag hvert 30. minutt fra kl. 04.35 til 01.05 (siste avgang fra flyplassen). Pris én vei: 80 kr. Hotellet har også [stor parkeringsplass](#) med ladestasjoner for elbiler.

Utstillertorg

Vi kommer til å ha et utstillertorg utenfor hovedsalene, der vi serverer forfriskninger, lunsj og gjennomfører ulike aktiviteter gjennom konferansen. En pakke for utstillere vil inkludere:

- Stand med konferansebord og plass til roll-up i to meters bredde eller tilsvarende (avtal hvordan du ønsker det)
- Inngang på konferansen to dager inkl alle måltider og forfriskninger for én person
- Halv A4-sides annonse i programmet, som både distribueres på nett som PDF og trykket til alle deltakere
- Logo på nettsidene til DynUG frem til konferansen
- Å være en del av rebusløpet på tirsdag, der deltakerne som ønsket det jobber i grupper og kjemper om å vinne flotte premier mellom konferanseslutt og middag.

Pris kr 25 000 per utstillerplass

Kommende arrangementer:

Portals Community Call

by Nickholas Heyduk

as Engineered Code

Hver måned

PORTALS COMMUNITY CALL

Every month Engineered Code holds a one hour community call, led by our resident Business Applications MVP Nicholas Hayduk.

What Happens on These Calls?

The format of these sessions is flexible, and might include things like the latest Portals news, training, and Q&A – the key is that is will be based on what the community wants.

This call is for any topics related to building portals on top of the Power Platform – and while we talk a lot about Power Apps Portals (the offering from Microsoft), if you've got questions or topics about other products or techniques to build a portal, we are happy to talk about that too!

To view the recordings of previous calls, see the [playlist on YouTube](#).

Next Community Call:
November 17, 2022 @ 3pm EST / 12pm PST
Topic: Power Pages JavaScript Examples

Register for the Portals Community Call

First Name:

Last Name:

Email Address:

What topics you'd like to see covered during the calls?
