## PORTALLUNSJ

[Last ned tidligere presentasjoner lengere ned på siden.](#)

Neste Portallunsj

### Visit Power Pages User Group Norway.

Information about Portallunsj (in Norwegian)

Vi samles en gang i kvartalet for å diskutere og dele erfaringer fra Power Pages på norsk!

Siden det er flest som er enten nybegynnere eller avanserte portal-folk: med på disse portallunsjene har vi innhold for både dere som akkurat har begynt å leke med Portals, og dere som er mest interessert i avanserte Portals-temaer.

Fast kjøreplan:

- Nyheter
- Arrangementer
- Ut-Av-Boksen-tema
- Avansert tema
- Neste møte

Kom gjerne med innspill og ideer hvis du har noe du vil dele, eller forslag til hvilken ut-av-boksen-funksjon eller avansert tema du ønsker å vite mer om. Det kan være alt fra demo av en liten feature du leker med i en trial til å presentere en hel portal du jobber på. Vi gleder oss til å se hva du jobber med om dagen.

Spre ordet og del med de du kjenner som er interesserte i Power Pages der ute. Her er målet å koble sammen nettverket til alle som jobber med Portals i Norge så vi kan bli bedre sammen!

Håper vi sees

Hilsen Ulrikke Akerbæk og resten av Power Pages User Group Norway

## Repaired Functionality

The following list details issues that are resolved/updated in this update.

### Accessibility

- Accessibility bug - Focus order is fixed on the form after pressing the submit button when there is a required field error.
- Accessibility bug - Provided keyboard focus indicator on the minimize button under site copilot chat window
- Accessibility bug - When talkback is enabled user is able to access radio button present in the 'Lookup Record' dialog
- Accessibility bug - When talkback is enabled user is able to access the sorting functionality for the table column dialog headers in the dialog

### Functionality

- Bug fixed to show warning message when end user make any changes to multi-select option set and navigate away from the form without saving it.
- Bug fixed to apply a proper font family for Rich Text Editor control on the form when basic form metadata is added
- File upload control enhanced for better visual experience
- Bug fixed in redeem invitation flow for a site when Content Security Policy (CSP) site setting is added
- Bug fixed in terms and condition page when Content Security Policy (CSP) site setting is added

### Library Upgrades N/A

### New Features

- Introduced site setting 'Timeline/HideCreatedByName' to hide user name in timeline control. Default value is false and user name will be shown

Content Security Policy (CSP) Cross Origin Resource Sharing (CORS) Cookie Permission Policy Others

Content Security Policy or CSP, is used by web servers to enforce a set of security rules for a web page. It helps protect sites from various types of security attacks like cross-site scripting (XSS), data injection, and other code injection attacks. [Learn more](#)

Specify source for all your website resources

> Default source  
Specifies the default source for content that is not explicitly defined by other directives. It acts as a fallback for other directives.

> Image source  
Specifies valid sources for images. Controls the domains from which images can be loaded.

Font source  
Specifies valid sources for fonts. Used to control the domains from which web fonts can be loaded.

Specific URL(s)

URLs \*

https://fonts.google.com/

+ Add URL

> Script source  
Specifies valid sources for JavaScript code. This can include specific domains, 'self' for the same origin, 'unsafe-inline' for inline scripts, and 'nonce-xyz' for scripts with a specific nonce.

Style source  
Specifies valid sources for stylesheets. Similar to script-src, it can include domains, 'self', 'unsafe-inline', and 'nonce-xyz'.

Select an option

> Connect source  
Specifies valid sources for XMLHttpRequest, WebSocket, or EventSource. Controls the domains to which the page can make network requests.

> Media source  
Specifies valid sources for audio and video. Used to control the domains from which media resources can be loaded.

## Analytics (Preview)

### 🚨 Note

Currently, you may only see a limited number of failure error messages. However, each subsequent release will include additional error messages for various types of failures.

The following are some example error messages:

- Error with Local sign-in provider if the LogonEnabled attribute is false for the Portal contact.

The screenshot shows a web browser displaying a Power Pages site. The site has a dark blue header with the company name and navigation links. Below the header, there are buttons for 'Sign in', 'Register', and 'Redeem invitation'. The main content area is divided into two sections: 'Sign in with a local account' and 'Sign in with an external account'. The local account section has a red error message: 'Invalid sign-in attempt.' Below this, there are input fields for 'Username' (containing 'paulcannon') and 'Password', a 'Remember me?' checkbox, and 'Sign in' and 'Forgot your password?' buttons. The external account section has an 'Azure AD' button. At the bottom of the browser window, the DevTools extension is open, showing a table of error messages. The table has columns for 'Time Stamp', 'Source', 'Level', 'Request Path', 'Message', and 'Mitigation'. The first row of data is highlighted with a red border.

Time Stamp	Source	Level	Request Path	Message	Mitigation
2024-05-02T18:16:06.0917...	Server	Error	/SignIn	LogonEnabled attribute is false for associated contact or multiple contact having same email address.	Please ensure that the 'LogonEnabled' attribute is set to 'true' for the contact associated with this username/email. Additionally, please maintain only one active portal contact associated with this email.

- Search for external entity isn't configured properly.

Design Studio

We are excited to announce Power Pages native support for Power Fx, a powerful low-code formula language for the Power Platform. This capability enables Power Pages makers and developers with a low-code language for authoring dynamic content within their websites.

The screenshot shows the Power Pages Design Studio interface. At the top, a formula bar contains the following Power Fx formula: `fx: ~Concatenate("You have ", CountRows(Filter("Banking Services Applications", Applicant.Contact = User.DatasourceuserID)), " applications in progress.")`. Below the formula, a preview of a banking portal is shown. The portal has a header with "Wo" and "My Banking". The main content area displays a personalized greeting: "Hello, John!" followed by a welcome message and a link to "Please see if you have existing applications". To the right is a user profile icon. At the bottom, there are two sections: "My Applications" with a table of application data, and "Quick Links" with a list of navigation options.

# Release Planner for Power Pages

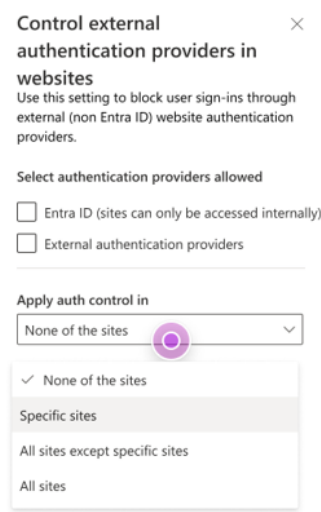

Enabled for	Public preview	General availability
Users by admins, makers, or analysts	Oct 2024	-

## Business value

Provide administrators with the ability to enforce who can access their Microsoft Dataverse data using Power Pages websites. Using this governance setting, admins can block certain authentication providers (and determine which authentication providers are allowed) in the Power Pages websites in their tenants.

## Feature details

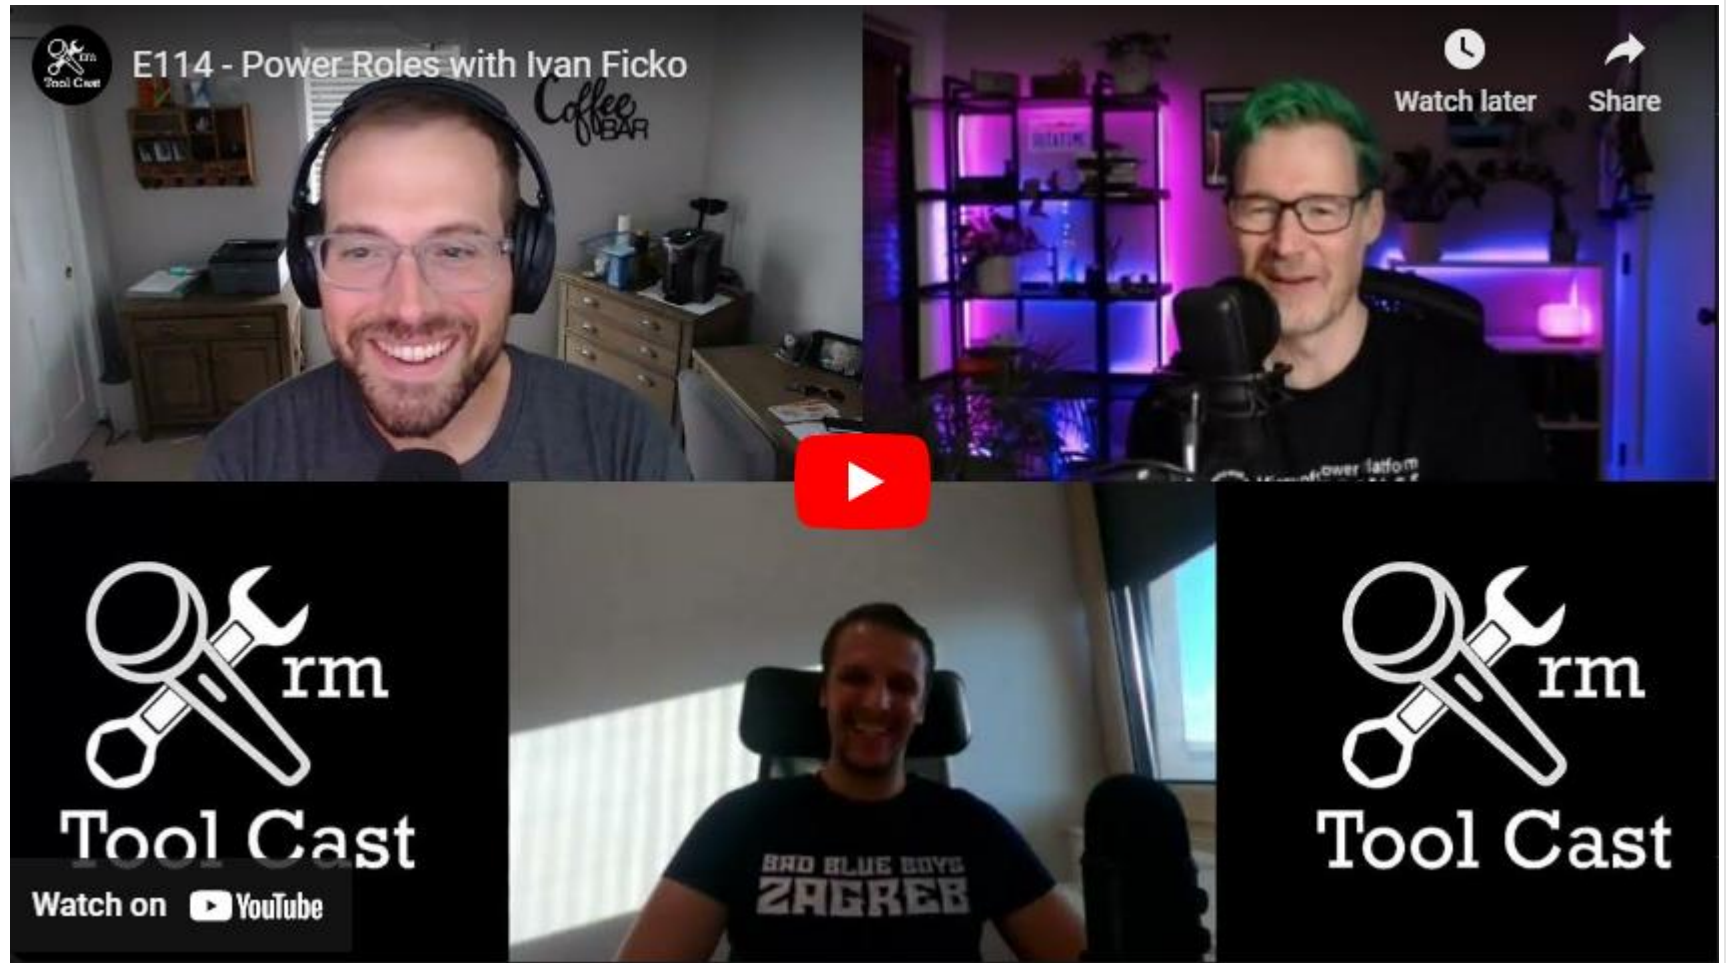

Currently, administrators have the control to block anonymous access to Dataverse data through Power Pages websites in their tenants. Building on this, the new governance control will allow admins to block certain authentication providers (and determine which authentication providers are allowed) in all the Power Pages websites in their tenants.

Disable

# Power Roles

by Ivan Ficko

<https://www.youtube.com/watch?v=7bN5KHxp6uw>

Enabled for	Public preview	General availability
Users, automatically	-	Dec 2024

## Business value

We addressed long-standing customer feedback by improving the site experience for visitors through expanded file upload options. Now users can easily drag and drop files or upload them directly from their camera.

## Feature details

File upload enhancements in this feature include:

- Upload larger files with an increased file size limit for SharePoint storage.
- Drag and drop files.
- Scan files for malware.
- Configure file upload for SharePoint storage with a streamlined experience in design studio.

Experience  
enhanced file  
upload for

sites

# FYI!

## File Uploader PCF

**Wilmer Alcivar** (He/Him) • 1st

Microsoft Business Applications MVP | MCT | Senior Principal Consultant at Va...

1mo • Edited • 🔄

🚀 So happy to see my latest PCF (Power Pages File Uploader) has been added to the [PCF Gallery](#).

The goal of this PCF is to allow an external user through Power Pages to upload documents by drag and drop with the option to preview the document before uploading it so that the user can be sure of the document being uploaded. 👍

This PCF also works for Model Driven Apps so internal users can do the same. For now it only supports PDF, Word and image files.

Finally, the uploaded files can be viewed in a grid, this grid displays the documents based on the associated record and the user who uploaded the file.

The document repository for this PCF is Azure blob storage so you will first have to configure this service if you want to use this PCF. 😊

Here is the link where you can download the code and even the managed and unmanaged solution:

<https://lnkd.in/gDNQG8S2>

And thanks [Guido Preite](#) for adding this one to the PCF gallery. 🙌

## Business value

Makers have Copilot support within Power Pages design studio for writing new Power Fx formulas or when trying to understand existing expressions. This helps in expediting learning and increasing productivity for makers and developers authoring business logic on their Power Pages sites.

## Feature details

### Transform natural language into Power Fx formulas

Makers input their logical requirements using everyday language, prompting Copilot to generate the corresponding Power Fx formula. Users can then review and refine these suggestions or input a new prompt if needed. This functionality streamlines the formula creation process and mitigates syntax-related errors.

### Decipher Power Fx formulas

When makers choose a Power Fx expression, they can ask Copilot for an explanation. A user-friendly narrative of the expression's purpose and function is provided, enhancing the maker's comprehension and mastery of their Power Pages formulas.

Generate and explain Power Fx formulas using Copilot

Enabled for	Public preview	General availability
Admins, makers, marketers, or analysts, automatically	Oct 2024	-

## Business value

This feature empowers fusion teams to efficiently create and manage web templates as modular components within Power Pages Design Studio. Makers can easily use the low-code Power Fx to configure data, enhancing productivity and fostering a collaborative environment. Pro-developers can craft reusable components, decoupled from data sources, while makers have the flexibility to bind these components to data sources using Power Fx formulas or expressions, tailored to their specific needs. This separation of concerns streamlines the development process and accelerates the delivery of robust, data-driven web experiences.

## Feature details

Web templates as components allow makers in the Power Pages Design Studio to set parameter values when using them on a web page. Additionally, makers can include dynamic data in these web templates using Power Fx formulas or expressions. Key points of this feature include:

- Availability in Design Studio for [web templates created as components](#).
- Authoring of Power Fx formulas using the formula bar to set the value of a component's [manifest properties](#).
- Utilization of data from Power Fx formula results in the web template for logic and experience, enabling developers to create components independent of data querying methods.

### What is #PPCC24 all about?

Be inspired by Microsoft senior thought leaders, the product experts, and the Power Platform. You'll also learn from Microsoft MVPs who are dedicated to bridging the gap between humanity and technology. PPCC is the perfect place to connect with folks who are eager to share their insights and knowledge on how the Power Platform can transform your business.

MPPC = PPCC

# Portals Community Call

by Nickholas Heyduk  
as Engineered Code

Hver måned

## PORTALS COMMUNITY CALL

Every month Engineered Code holds a one hour community call, led by our resident Business Applications MVP Nicholas Hayduk.

### What Happens on These Calls?

The format of these sessions is flexible, and might include things like the latest Portals news, training, and Q&A – the key is that it will be based on what the community wants.

This call is for any topics related to building portals on top of the Power Platform – and while we talk a lot about Power Pages (the offering from Microsoft), if you've got questions or topics about other products or techniques to build a portal, we are happy to talk about that too!

To view the recordings of previous calls, see the [playlist on YouTube](#).

**Next Community Call:**  
August 29, 2024 @ 3pm ET / 12pm PT

**Topic:**  
Plugins With Power Pages

### Register for the Portals Community Call

# KNOBS AND SWITCHES

The image is a podcast cover for 'Knobs and Switches', episode 38, dated August 7th, 2024. It features two hosts: Ulrikke Akerbæk on the left and Nick Doelman on the right. The cover includes the 'Power Platform Boost Podcast' logo, which consists of a microphone icon with the word 'BOOST' in colorful letters. The episode title 'KNOBS AND SWITCHES' is prominently displayed at the bottom in large white text. The background is a solid purple color.

### Visit Power Pages User Group Norway.

Information about Portallunsj (in Norwegian)

Vi samles en gang i kvartalet for å diskutere og dele erfaringer fra Power Pages på norsk!

Siden det er flest som er enten nybegynnere eller avanserte portal-folk med på disse portallunsjene har vi innhold for både dere som akkurat har begynt å leke med Portals, og dere som er mest interessert i avanserte Portals-temaer.

Fast kjøreplan:

- Nyheter
- Arrangementer
- Ut-Av-Boksen-tema
- Avansert tema
- Neste møte

Kom gjerne med innspill og ideer hvis du har noe du vil dele, eller forslag til hvilken ut-av-boksen-funksjon eller avansert tema du ønsker å vite mer om. Det kan være alt fra demo av en liten feature du leker med i en trial til å presentere en hel portal du jobber på. Vi gleder oss til å se hva du jobber med om dagen.

Spre ordet og del med de du kjenner som er interesserte i Power Pages der ute. Her er målet å koble sammen nettverket til alle som jobber med Portals i Norge så vi kan bli bedre sammen!

Håper vi sees

Hilsen Ulrikke Akerbæk og resten av Power Pages User Group Norway
