Visit Power Pages User Group Norway.

Information about Portallunsj (in Norwegian)

Vi samles en gang i kvartalet for å diskutere og dele erfaringer fra Power Pages på norsk!

Siden det er flest som er enten nybegynnere eller avanserte portal-folk med på disse portallunsjene har vi innhold for både dere som akkurat har begynt å leke med Portals, og dere som er mest interessert i avanserte Portals-temaer.

Fast kjøreplan:

- Nyheter
- Arrangementer
- Ut-Av-Boksen-tema
- Avansert tema
- Neste møte

Kom gjerne med innspill og ideer hvis du har noe du vil dele, eller forslag til hvilken ut-av-boksen-funksjon eller avansert tema du ønsker å vite mer om. Det kan være alt fra demo av en liten feature du leker med i en trial til å presentere en hel portal du jobber på. Vi gleder oss til å se hva du jobber med om dagen.

Spre ordet og del med de du kjenner som er interesserte i Power Pages der ute. Her er målet å koble sammen nettverket til alle som jobber med Portals i Norge så vi kan bli bedre sammen!

Håper vi sees

Hilsen Ulrikke Akerbæk og resten av Power Pages User Group Norway

Component	Description	Update process
Power Pages solutions	Solutions that are installed in Microsoft Dataverse environment and contains the metadata tables for any website.	<p>Previously, you had to manually update your solutions and packages to receive the latest features and fixes for your Power Pages sites. However, with the integration of the Dataverse Base Portal package (CDSBasePortal) into the Power Platform's automated update system (PDU), this package is updated automatically in environments where an older version is already installed. This means you no longer need to manually update the Dataverse Base Portal package. The system automatically applies updates, ensuring you have the latest improvements without any extra effort.</p> <p>Note: The automatic update applies only to the Dataverse Base Portal package. Other packages, such as standard data model template packages, still require manual updates. If you're using other standard data model template packages like Community, Customer Self-Service, Employee Self-Service, Partner, or any custom templates, you need to continue updating these solutions manually.</p>
Power Pages website host	The Power Pages website host is the Azure web application that forms the actual website.	<p>The Power Pages website host updates automatically for all sites.</p> <p>Note: A new version of Power Pages website host is backwards compatible with all supported versions of Power Pages solutions. However, once a solution version becomes unsupported, the solution isn't certified to run with the new version of Power Pages website host.</p>

Upgrade Portal Packages

Radical Architecture Opinion: Use Power Pages instead of Model-Driven Apps for your **internal** projects. Yes I said **internal**.

It can be much cheaper.... 🇺🇸 .

Power Pages can be a terrific Model-Driven App alternative to give you nearly all the low code power of Dataverse, without the price. Best part - you can secure it to only users within your company!

[Francesco Musso](#) and I have run the numbers and we discovered
The cheapest Model-Driven App (MDA) license is \$5 per user per month.
If you have 95 users that's $\$5 \times 95 = \475 *per month*.
Power Pages costs \$200 *per month* for 100 users.

Are Power Pages harder than MDA?
No - Many Power Pages forms and views you build in exactly the same, drag-and-drop, way as an MDA.

Power Pages offers many of the same cool features as MDA out-of-the-box:

- 📄 SharePoint Integration
- 📄 Embedding Canvas Apps
- 📄 Export view to Excel

Power Pages or Model Driven App?

What's new and planned

News

Feature details

Create a comprehensive event portal where prospective attendees can access a list of events, an event details page, and a registration page. The portal can be created using Customer Insights and a Power Pages template to speed up the creation process. You can easily edit the portal using Power Pages Studio.

- Leverage an out-of-the-box Power Pages template for quick deployment.
- Use Power Pages Studio to further customize and style your portal.
- Create a list of upcoming events.
- Provide a detailed summary for each event, including session information, speakers, and a registration form.
- Publish the portal using Power Pages hosting capabilities.

Create event portals with event and registration details using Power Pages

Powerful Devs Hack Together

The Powerful Devs Hack Together is a 2-week global online hackathon where you'll have the opportunity to apply what you've learned from the conference to build smarter, faster solutions with less effort. This will run from February 13-28, 2025 at aka.ms/PowerfulDevs/Hack

Rules of entry!

Watch this video to understand the rules of entry and how your solution will be judged. Read the [official rules!](#)

What solution should you build?

The theme of the Powerful Devs Hack Together this year is secure and scalable AI-powered solutions, but beyond that, it's entirely up to you!

We are looking for original ideas that solve real-world challenges, using Power Platform low-code and pro-code tools and technologies in an appropriate and feasible way. We will be not only looking at what you build, but also how you deploy and maintain it, so show us how you can automate the build, deployment, and testing of your solution. We love seeing visually appealing solutions, but do consider accessibility, diversity, and inclusion.

Newsletter

Power Pages Pro

Tino Rabe

The image shows a LinkedIn post for a newsletter. At the top left is a yellow square logo with the text "Power Pages Pro Newsletter EVERY WEEK!" and a blue diamond icon. To the right of the logo is the word "NEWSLETTER" in a grey box. The main title of the post is "Power Pages Pro - Newsletter" in large black font. Below the title is a short description: "Kickstart your path in Power Pages with this weekly Newsletter". The author's profile picture is on the left, followed by the text "By Tino Rabe" and "Specialist & MVP in Microsoft Power Pages". On the right side, it says "Published weekly" and "2,229 subscribers". Below this information are two buttons: a blue "Share" button and a white "Subscribed" button with a checkmark. A white box below the buttons contains the text "98 editions". Below that, it says "Published 5 days ago". The main content of the post is a large, vibrant graphic with a blue and purple background. It features a Microsoft MVP logo in the top right corner, the text "Power Pages Pro Newsletter" in a large, white, cursive font, and "N° 98" in a large, white, bold font. At the bottom of the graphic, it says "New edition every week!". Below the graphic is a caption: "Power Pages NEWSLETTER N°98" by "Tino Rabe". At the bottom of the post, there are icons for social media sharing and the text "Bülent Altinsoy and 18 others" on the left, and "16 comments" on the right.
